ABOUT ME

With a strong team spirit, focused on the development of each team member, focusing on the quality of communication and interpersonal relationships. Focused on the interests of the client and the company so that the proposed objectives are achieved. With aptitude for management and leadership, with initiative and in search of constant improvement and innovation.

EXPERTISE

Since I started my career as a computer programmer, I have been increasing my passion for computers and application development. I have special taste in web application development, trying to make the best use of all possible services. The constant evolution of technology and programming languages are a constant challenge that makes me always want to learn more. The skills acquired reflect our knowledge, so I have invested in constant training, not only in terms of programming, but also in project management, team management and communication.

ACCOMPLISHMENTS

Integrated in various types of software development and maintenance projects. In a continuous process of evolution and learning.

Team Leader in the current project, focusing on organization and management tasks, backlog management, deadline management and release quality.

Delivered new or enhanced development, such as:
Web applications
Web sites
Desktop application (for internal process management)
API's for business management
